Dear Phil, Bob and Staff,

On behalf of St. John's Lutheran Church I wish to express our grateful appreciation for our association with Bunn-Minnick Co. during the rebuilding of our 24-rank organ.

While searching for an organ builder it became quite clear that your company not only excelled in quality workmanship and expertise but also offered a personal interest in each organ and church situation.

Very few people have an understanding of the workings of a pipe organ. During your meetings with discussion periods and audio-visual presentations the workings of an organ were made understandable to St. John's committee and congregation.

After signing our contract your entire staff continued to be constantly available for consultations as needed.

During the installation of the rebuilt organ, our church and its needs were respected in a caring and concerned manner. The many long late hours spent to complete the organ on time as promised were an indication of your personal concern for your service to people!

Your total dedication and financial commitment to restoring our facade pipes will always be remembered as the final proof that you have such an honest desire to do a job well and completely.

The dedication services were a very emotional time as we listened to the beautiful sounds of our organ and reflected on all the wonderful things that have happened within our "people" during the past year of working, sharing, giving, learning, thanking and worshipping.

I was privileged to have been one of those who was chosen to serve on the organ committee.

If we, at St. John's, can ever share information or offer recommendations to any interested churches, please inquire.

Our active music worship has been revitalized and will continue to thrive with our superb Bunn-Minnick organ!

Sincerely,

Janet High
St. John's Organ Task Force Committee
