Oct. 13, 1989

Dear Phil and Bob,

I would like for you, and the rest of your fine employees, to know how completely satisfied we continue to be with our pipe organ at Riverside United Methodist Church. We are indeed fortunate to have had your intense interest and willingness to work with us to obtain our used Wicks organ.

From our very first discussions about pipe organ possibilities, through the finding, testing, transportation, rebuilding, and final installation of our instrument, you and your company displayed the highest degree of professionalism. There has never been a moment of regret reflected by our committee or by the congregation about the decision to purchase a pipe organ. This, I feel, is mainly due to your complete knowledge of the field, and your anticipation of possible problems. Your experience alleviated most fears. For this we are thankful.

Maintenance and tuning have never been problems. Our greatest hope now, is that in the near future you can return to us with realistic plans to enlarge our installation with additional ranks.

Thank you again for your personal attention and interest in our small neighborhood church.

Respectfully,

A handwritten signature in cursive script that reads "Jack".

Jack O. Woodruff
