Dear Committee,

The Bunn=Minnick folks built a 17 rank instrument for our chapel this year, and what they were able to fit in a very small space is nothing short of amazing! Organist/composers Michael Burkhardt and John Weaver have both played the organ and expressed delight and amazement with the organ's color, versatility and design.

In the process of selecting a builder for our chapel instrument, we invited another nationally known builder to submit a bid. The organ committee was dismayed at their report: where the Bunn=Minnick company saw great possibilities, the other firm saw only obstacles and hurdles. The other company saw room only for a much smaller instrument in the available space. How glad we were to have had the Bunn=Minnick design, enthusiasm and cooperation in our discussions! In the end, there was only one logical choice to make, and our music ministry will be enriched by the Bunn=Minnick organ for many years to come.

If you'd like to come see what magic the Bunn=Minnick artisans were able to work in our chapel, we'd be happy to be your host. I'd also be glad to speak with you if that would be helpful.

Best wishes in your search.

Sincerely,

Charles R. Snyder
Minister of Music and Education
